

Lower IT support cost

Does it really make sense to have your high-end engineer resetting passwords and checking backup status? Reduce your overall support costs by utilizing ProStratus managed services to supplement your busy IT support staff. Our mission is to make your internal staff more effective at a lower cost.

Managed IT Service Advantages

Managed approach = resolution before crisis

Lower IT cost by up to 40%

Reduce risk and increase security

24/7 technical support

Always have the latest up-to-date tools & software

Save time and resources

More time to complete strategic projects

Fast response times

Increase satisfaction and competitive edge

Proactive IT support takes the complexity out of technology by providing comprehensive support at a flat rate price - no surprises

Partner not replace

We are here to partner and streamline your operation, not replace your on-site staff. It is very difficult to maintain all the in-house expertise for security, support, maintenance, mobility, and communication, as well as keeping up with all of the latest trends. Utilizing the latest tools, our experienced staff will provide top-level support at a low, fixed budget price. We can handle the everyday monitoring and maintenance to keep your network in top shape. Partner with ProStratus to supplement your in-house support for a comprehensive up-to-date solution.

More time for strategic initiatives

Free up your internal staff from mundane everyday tasks so they can focus on strategic initiatives. These key objectives will impact your business and make a real difference on revenue and costs.

Mix and match services

Pick the service you need. You're the customer. Mix and match to get the right set of services to streamline your business. It is easy to start and easy to scale with your demands. Contact us and we will customize your package today.
